

Company
Profile

Pietro
Florentini

**Our commitment
for a more
sustainable future.**

Here at Pietro Fiorentini, we want to help building a better future for coming generations by developing technologies and solutions for a digital and sustainable world.

Our goal is to drive the changes that will impact those scenarios in which our Company lives and works, such as the digitalisation of networks and the transition towards cleaner energy sources.

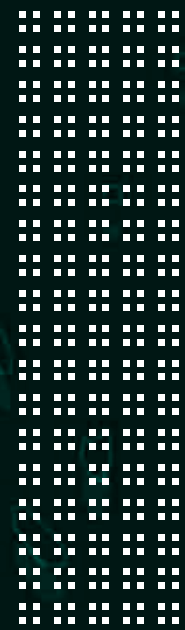

With over

years of history that began in Italy, Pietro Fiorentini is today a Group with a worldwide presence.

A journey that started long ago.

The history of Pietro Fiorentini is that of an Italian company that has conquered the world, achieving increasingly ambitious goals through a constant drive towards excellence. This journey of ideas, values and people began over 80 years ago, and has grown bigger and stronger every day.

Pietro Fiorentini is one of the largest industrial companies in the North East of Italy, with its main headquarters at Arcugnano, near Vicenza. The Group has more than forty production sites and commercial offices both in Italy and abroad, employing around 2,800 people worldwide.

An aerial photograph of a dense, vibrant green forest. A dark, winding river or stream flows through the center of the forest, creating a meandering path. The trees are thick and cover the entire landscape, with some power lines visible in the upper and lower portions of the frame.

Respect for the environment and a constant endeavour to achieve the lowest possible impact of production activities are at the core of our commitment to a sustainable growth, which does not harm the world in which we live.

Because we have countless opportunities to create our future, yet only one planet on which to live it.

An aerial photograph of a dense, vibrant green forest. A winding river or stream flows through the center of the forest, its dark blue water contrasting with the surrounding foliage. The trees are thick and cover the entire landscape.

**We have big plans,
for the planet too.**

**We are working hard
to make a difference.
For everyone.**

At Pietro Fiorentini, we have always taken not only our customers and employees into great consideration, but community as well.

We do this by investing in workplace safety and training initiatives, valuing human diversity and strengthening relationships with local communities, developing innovation projects that will contribute to create a future more accessible for all.

A person wearing a dark suit is seated at a desk in an office. They are looking at a laptop. On the desk, there is a blue cup and some papers. The background is slightly blurred, showing more of the office environment.

Our Company adopts a governance model based on a clear code of ethical standards, and a management system that clearly regulates the equity of salaries and bonuses. We also ensure that all our financial information is completely transparent and compliant with tax regulations and legal requirements.

Our commitment to sustainable management is guaranteed by a system of responsibility, defined at the level of governing and control bodies, through dedicated processes, procedures and tools.

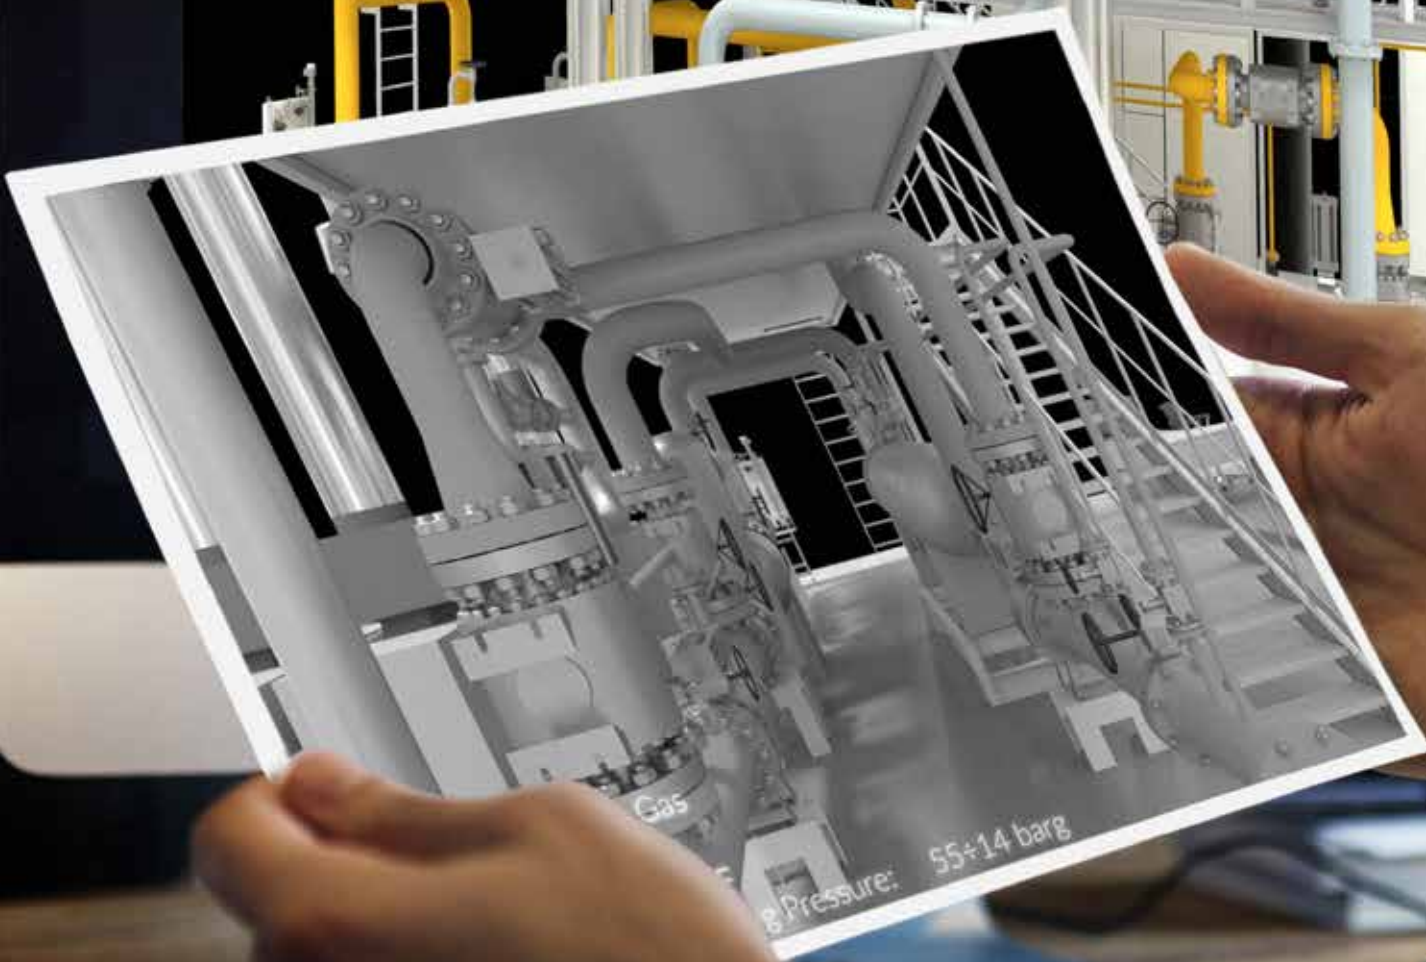

Transparency and integrity in every situation.

We do everything to ensure that it is done right.

A complete range of products, systems and services to provide our clients with comprehensive end-to-end solutions. At Pietro Fiorentini we have the expertise and know-how to guarantee presence and competence at every stage of the process, and ensure that our clients can count on highly technological and high-value solutions.

Pietro Fiorentini was one of the first Italian companies to adopt Lean Thinking, constantly searching for ways to improve and achieve new goals rather than being satisfied with accomplished achievements.

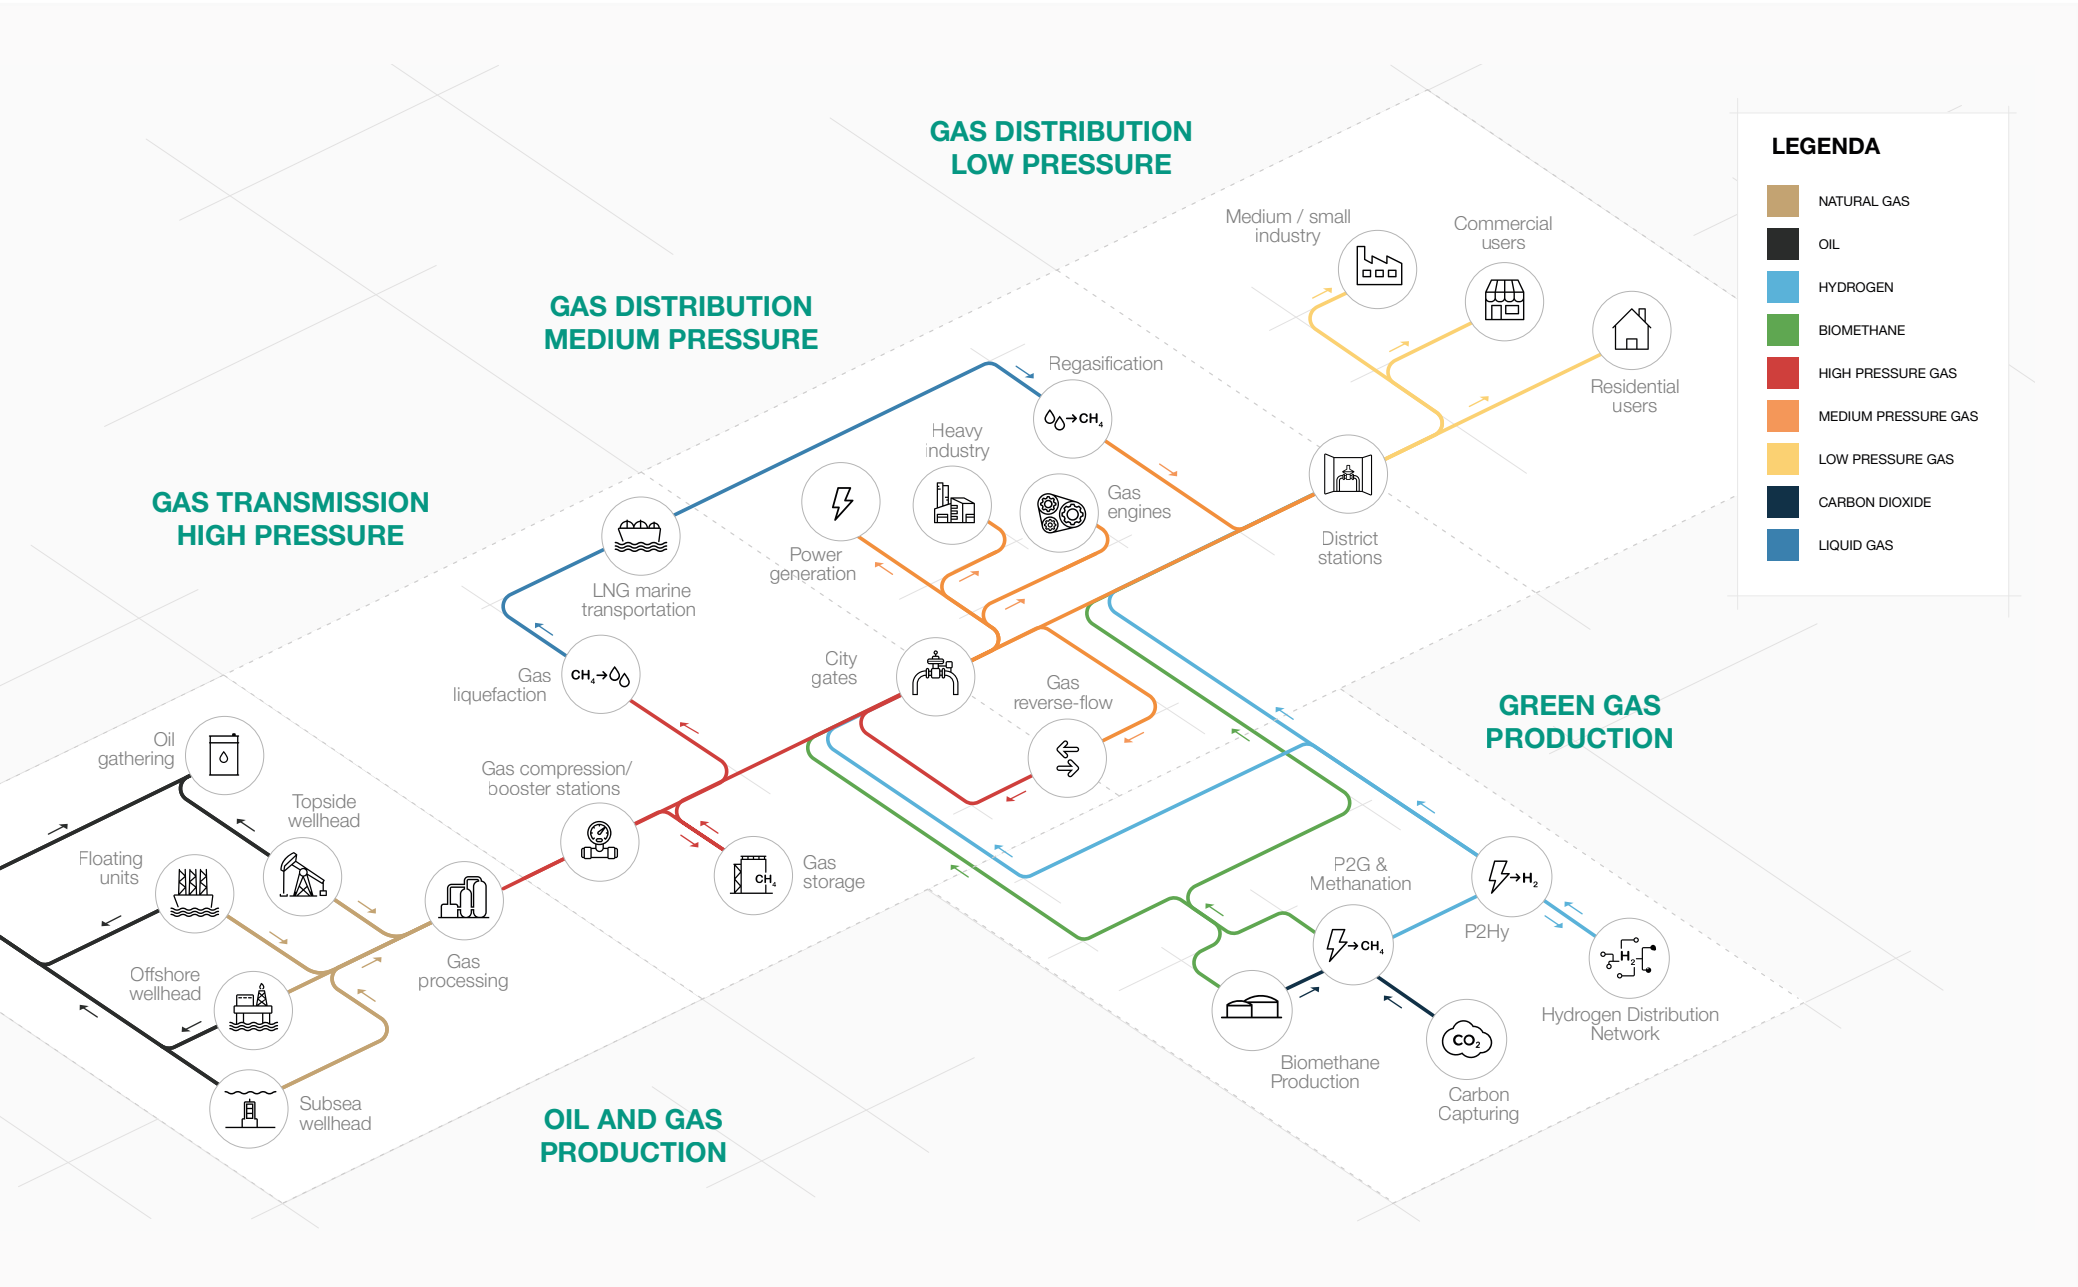

Today, we are focusing on integrating with the flexible practices of Agile mindset, to drive our company culture towards new horizons.

A close-up photograph of a person's hands holding a blue sticky note and a yellow pencil. The background is blurred, showing other people and more sticky notes on a wall. The text "More solid, yet lighter processes." is overlaid in white, bold, sans-serif font.

**More solid,
yet lighter
processes.**

Our offer for the energy supply chain.

Pietro Fiorentini offers technically-advanced solutions for the energy supply chain, that meet the needs of a wide range of different customers: from renewable energy producers to oil and natural gas production companies (both onshore and offshore), gas transmission companies and distribution utilities.

Clean energy:
a better future for
generations to come.

zero emission

Green gas production.

We believe in a greener, more sustainable future for both families and businesses.

This is why we are investing in startups and projects that exploit the potential of alternative sources such as biomethane, hydrogen and power-to-gas, with the aim of decarbonising the energy sector and developing zero-emissions systems.

The image shows an oil field at sunset. The sky is a mix of orange, yellow, and blue, with scattered clouds. In the foreground and middle ground, several oil pumpjacks are silhouetted against the bright light of the setting sun. The pumpjacks are mechanical devices used for extracting oil from the ground. The overall scene is industrial and atmospheric.

**At the
beginning of the
value chain.**

Oil & Gas production.

Pietro Fiorentini offers a wide range of solutions for companies operating in the extraction, storage and treatment of oil and natural gas, ensuring the highest level of reliability even under the most challenging conditions.

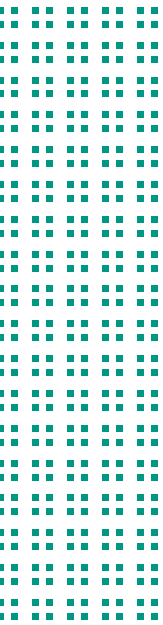

The background image shows a complex industrial facility for gas transmission. It features numerous large green valves with handwheels, white cylindrical storage tanks, and a network of pipes and metal support structures. The scene is brightly lit, suggesting an outdoor or well-lit indoor environment.

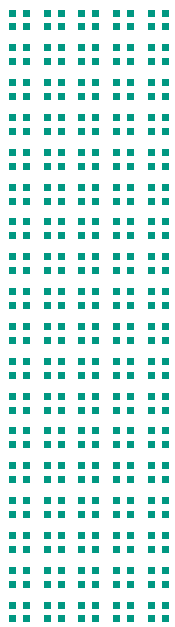

High pressure gas transmission.

When it comes to gas transmission, Pietro Fiorentini solutions represent the utmost in quality, safety and service, essential values for us and our customers. We produce systems, components and services both for the pipeline network and for LNG transportation, covering every stage from processing facilities to the entry into distribution networks.

Following the gas flow.

**We create
networks
without
borders.**

Medium pressure gas distribution.

Thousands of Pietro Fiorentini systems and components are installed in distribution networks all over the world.

They are specially designed to regulate gas pressure to the correct level depending on use, reaching even the most remote places to create a truly borderless network.

Low pressure gas distribution.

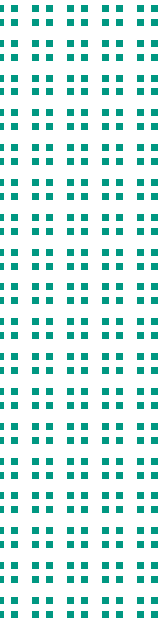

The last stretch of the distribution network is the one that allows gas to reach commercial and residential users.

Governors, digital devices, smart meters: all Pietro Fiorentini products are at the forefront in terms of technology and always put user safety first.

Right in the heart of cities.

Enabling the water digitalisation.

Hardware and software solutions for the water sector.

Water is a primary resource and should be used responsibly.

The synergic integrated products and services offered by Pietro Fiorentini and its subsidiaries Fast, Terranova and Arcoda, boosts performance and efficiency across the water network: from metering and remote control to reporting, billing and technical assistance.

The background of the slide is a vibrant green and blue gradient. It features a pattern of binary code (0s and 1s) and yellow circuit-like lines that resemble a printed circuit board. In the lower-left corner, a hand is visible holding a silver laptop, with the keyboard and trackpad partially visible. The overall aesthetic is high-tech and digital.

Innovation and technology for environmental management.

A person's hands are shown holding a small green plant with soil. The background is a blurred green field. Overlaid on the image is a digital circuit pattern with glowing nodes and lines. The text is contained within a white-bordered box.

From waste to resources.

Jointly with its subsidiary Sartori Ambiente and Terranova Group's companies, Pietro Fiorentini creates advanced waste sorting and separate collection systems by leveraging hardware and software solutions automating data flow and analysis and contributing to the development of the circular economy through the waste valorisation process.

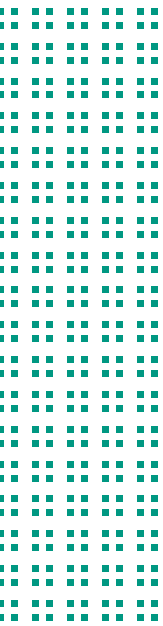

Data management services.

Thanks to the solutions provided by Group companies and the services of the new Information Centre at our Rosate facility, we can offer a wide range of highly adaptable software for public utility companies involved in gas, electricity, water and waste management.

Valuable information for the utilities sector.

**“Progress cannot be
we are satisfied with**

be generated when
n existing situations.”
